Comments on course effectiveness

Practice tests were great. i also enjoyed the way the homework was set up on webwork. good program!

Lots of opportunity's for extra credit and online homework was great because you get unlimited trys and get to know if the answer is right or wrong.

Quizzes were great and in class participation helped

The website that the homework was on was awful. I wish it would help you understand the problem, if you didn't know how to do it instead of just telling you if it was right or wrong.

Online Notes, and being able to get a fast response to emails

Good teaching, and talking.

It was covered in a timely manner and explained in a way that was easy for everyone to understand.

homework and class problems

good lectures, it is a good course for those who have work ethic, and everyone who makes the effort should be able to succeed. it was too early however, causing the Professor to be forgetful

great reviews and homework

Very organized material, clearly stated expectations

Course was well organized and good objectives

This course didn't feel as completely overwhelming and confusing as some math classes can which was a help.

study guides online, videos, VERY helpful materials on webct to help with classwork.
Cristian was EXTREMELY helpful and patient with all of his students. His lectures are some of the best Ive ever seen.
Having everything accessible online was very helpful. As well as having the slides up on the online site was great!

More homework from the book and handwritten to turn in on paper.
There were a lot of additional resources posted on line for help understanding the material better and to help complete the homework.
reviews homework help
The way quizzes were administered was a very effective method because it gave us time to study the material. With the homework being online I was also able to work more efficiently.
Materials easy to understand and well organized. The homework on web-ct gave immediate feedback allowing me to focus more on the concepts that I didn't pick up in class. The book gave good examples of the principles taught in class.
It was a great review. i really liked the online videos
Instructor Comments
Cristian was amazing. He is an incredibly gifted teacher and I am so glad I had him during the semester.
so willing to help in ANY way, meet with students, hold reviews, extend questionable homework.. such a good teacher!
aa
He is young and very personable which is good and not as intimidating. He likes to offer a lot of help and extra credit to students.
Best Math Teacher I have ever had, made time for students and was willing to teach at the pace needed to help the class as a whole. We need more teachers like Christian.
likjyweoiryu ooiaupo809
He could explain things a little more clearly, maybe put up some practice questions and then go around the classroom and help people if they need help instead of using the clickers.
Always there for help, wiling to work with students
at times slow down to hear if the class understands
Great teacher, did an awesome job explaining confusing content. Very organized
Great teacher!! Always there for help and easy to get a hold of
I felt like Christian was playing for my team. He always checked to understand that the class was following him in lectures and he made himself very available to student time outside of class hours. The extra review sessions on Wednesday shows how much he wanted us to succeed, and that he was willing to put in the extra time to make that happen.
very nice and always willing to help
He was very open to questions and made sure you understood before moving on. He made himself very accessible through e-mail, office hours discussion hour,and tutoring center.
Good talker, and good Teacher.
Way the class material was organized, always there to help
He was always available to help if you needed it. He knew how to do the math, but it seemed like he was unsure of how to teach it to others.
Practice tests, and excellent flexibility as well as special effort to help students at need. this was a great course
YYou could tell he really understand math, i learned a lot form him, great teacher.
The instructor was very helpful and patient with students. The instructor took time to go over those concepts that were more difficult and worked through more than one problem with students on these more difficult portions of the curriculum.
He was patient with the class and never derved into more complex material until most of us understood the basics. He also had creative ways of memorizing formulas that helped out a lot.
entertaining cheerful
Good teacher... kind of wierd
