Comments on course effectiveness

Class was taught in a way that made you confident that you knew the process needed to get the correct answer.

1. Great test layouts 2. Easy to understand

Great class. I thought the scheduling was perfect for it and I learned a lot

the lesson plan was at a great speed, material studied was covered on the tests

A bit sloppy on the board, although i think it would have helped if he had a chalk board instead the small dry erase board area he had to work with. Online notes would be awesome, if he would be able to record his sessions. Some times i felt that i didn't pay attention to class at all because i was so focus on note taking.

Christians attitude toward us was admirable, he was really helpful.

Practice exams were excellent for doing test review and study. Being able to email my instructor with questions was very beneficial and I got quick responses.

I hated webwork homework. At times you spent more time figuring out how to input the answer than focusing on the math concepts. Webwork distracts from learning concepts and applying them.

The homework that he gave and the exam that he provided online.

First Christian Sampson was very good at communicating and keeping in contact with his students in class, via e-mail, or in the math center. He explained things well and really did care if his students were learning the material. At the first of the semester Christian sent out his own teaching evaluation sheet that we had to fill out in order for him to teach us , and that helped a lot. Secondly Christian related well with his students since he is a graduate student and he did all he could to help us succeed, which we did greatly with a 91.95% final average!

- test reviews were very helpful - the content in the book was exactly what we were tested on

This course was organized and exams reflected what we had learned in lectures.
1. Use of WebCT 2. Excellent Review Sessions
Practice exams he posted were awesome. Webwork still needs some tuning.
BEST MATH 1060 HE GAVE US QUESTIONS TO STUDY FOR AND PREPARE US We gave in our questions we went through many of the problems SUCH A GREAT CLASS! LOVED IT!
WebCT needs improvement! Everything else was great.
Instructor Comments
Sometimes hard to follow but was very respectful of students. Would always help with problems that I would have.
1. Loud voice 2. Good handwriting - in terms of can be read from anywhere in class.
best math teacher I've every had.
I loved this class because he was really into what he was teaching. You could tell he really loved math and wasn't just teaching because he had to he really wanted to.
Best instructor I've had so far. He taught in a way that was understandable and a pace that was good for everyone.
Was nervous before taking this class but it was taught so that I always felt like I knew what was going on and what I needed to know.
I think that all Christian needs is more opportunity to teach so he can improve on his skills.
Christian Sampson was an awesome instructor and was super helpful. I would highly recommend his class to any future trig students.
BEST TEACHER, He helped me so much! Loved it so MUCH!!!!
The instructor was very approachable and polite with any question that was asked. He did an excellent job of presenting the material in a way that was easily understood.
1. Communicated clearly 2. taught effectively
You can tell he really wants everyone to succeed, and he does everything within his power to make that happen, and he's nice. I'd definitely recommend him. He went to fast at the beginning of the semester, but listened to student feedback and slowed down, which is amazing, most teachers go their own pace the whole semester.
He was very personable, answered questions respectfully. He explained things out in simple terms so everyone could understand them. Communicated all due dates and assignments effectively to make sure we could get everything done on time.
I thought Christian was great. I feel like he actually cared about us as a class. He was understanding yet he pushed us. I think he's a great math teacher and I would take any other math class from him if he was to teach again. He did a great job
Approachable, and took time to answer questions thoroughly
Christian was a great instructor. Always made himself available to the class. Went over problem areas/concepts he felt the class needed to review. Encouraged learning through quizzes and extra credit!
The lecture that he gave sometimes make no sense in its own meaning and the practice exam that he gave is very helpful.
